Lambdas
All CUDL Lambdas

Write logs to

Cloudwatch log group

Subscription filter pattern that matches: ERROR, WARN, 5XX, time outs and lamda error pattern.

SNS Topic
CUDL_Data_Processing

Lamdas write logs. Errors thrown by lamdba handlers all have set pattern, that includes the original event message that caused the error.

SNS Message Endpoint:
/logs/handleErrorLog

Loading UI

View Logs:
/logs/view-logs.html

Process where logs are reported back from Lambda functions to users.

loading-ui-db

Stores all errors received

View logs display errors, grouped by:

- System errors (ERROR, WARN, 5XX, Timeout)

- Lambda Errors (Contain more information including which files being changed triggered the error).
